“Performance Paints & Coatings for Aviation”

“Performance Paints & Coatings for Aviation”

Air-Tech Products

AIR-TECH manufactures only the finest products for aviation. Using advanced epoxy and polyurethane chemistries, AIR-TECH takes advantage of the latest technology for its paint, fabric covering system and its HARD DECK floor coatings.

The “Wet Look” high gloss finishes AIR-TECH offers have become the standard of the industry.

The AIR-TECH Fabric Covering System is Easy!

Completing a fabric job with AIR-TECH materials is easy when compared to alternate systems. Little sanding is required for a smooth high gloss finish. Fewer coats drastically reduce the time required for the job and AIR-TECH kits include all the materials necessary for the normal job. Follow AIR-TECH’s four easy steps:

- ✍ Cover the aircraft with heat shrinkable polyester fabric.
- ✍ Spray three wet “cross coats” of AIR-TECH fabric primer.
- ✍ Sand as needed.
- ✍ Spray two coats of AIR-TECH flexible polyurethane color coat.

LET IT DRY AND FLY!

- AIR-TECH is STC'd for most models.
- AIR-TECH materials are not subject to most weather. It can be applied almost anytime – NO BLUSHING!
- An AIR-TECH fabric job is easy to repair. Just follow AIR-TECH’s procedures for an invisible repair.
- AIR-TECH offers any color including METALLICS.
- AIR-TECH fabric primers and paints are flexible. They are manufactured for flexible resins; not flex agents or plasticizers which will exit the film over time making it brittle.
- AIR-TECH paints are stain resistant – fuel stains or bird dropping stains are a thing of the past.

Hard Deck Floor Coating System

AIR-TECH’s proprietary epoxy, silicone and polyurethane chemistry ensure HARD DECK will perform on new or old floors in the severe environments of aviation hangars and shops.

Proven performance in hangars and shops guarantees success on your floor whether it be an auto dealership, factory, mill, warehouse, laundry or simply a carport or garage.

Resistance to chemicals, “hot tire” stains, brake and hydraulic fluids, fuels, salt and abrasion is inherent in the HARD DECK system. HARD DECK coatings are non-yellowing.

Hard Deck Advantages

- Maximum Chemical Resistance
- Complete System includes cleaners, preparation and coating materials
- Ceramic-Like wear resistance
- Use on new or old floors
- Easy to apply
- Reasonable cost
- Hi gloss showroom look
- Wide color selection
- Non-skid option for any color choice
- Protects graphics or lines
- Maximum adhesion
- Environmentally friendly formulas
- Technical support
